

I. What do you see in the picture?

Suspension Weather Selection

Suspension Lift / Descent

II. What is important when lowering the legs of the pallet down?

- The legs are lowered before the pallet is lifted.
- The legs are lowered only after lifting the pallet so that they do not drag against the ground.
- Keeping the feet in place is ensured by using foot restraints.

III. What is important to remember before driving out from under the stage?

- Disconnects any electrical wiring between the vehicle and the cargo area.
- Check the operation of vehicle lights.
- Checks the locking of the cargo compartment doors.

IV. Can the level lift be lifted even if the pallet locks are closed?

YES / NO

V. Why is it important to drive carefully and directly from under the pallet?

- In order to make the start as economical as possible
- In order to avoid the vehicle hitting the legs of the pallet
- In order to avoid moving the pallet while it is on the legs
