HYDRAULICS & PNEUMATICS

Pneumatic and hydraulic schematic circuits design

Schematic symbols involved in a compressed air distribution and typical for pneumatics

I. Match the name of the element to its symbol according to the options below.

FRL unit / Air receiver / Compressor / Manometer

II. Match the name of the element to the number of the picture.

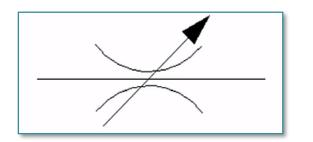

HYDRAULICS & PNEUMATICS

Pneumatic and hydraulic schematic circuits design

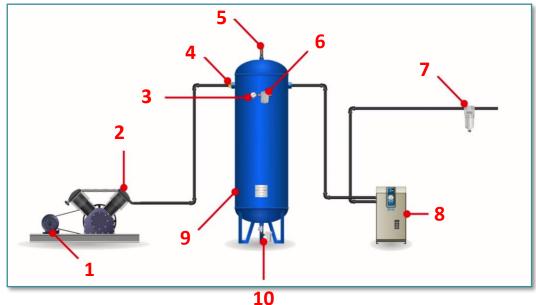

Schematic symbols involved in a compressed air distribution and typical for pneumatics

III. Write the name of the valve depicted by this symbol:

IV. Match the numbers in the picture to the options for compressed air production parts:

	Safety valve	 Check valve
_	Surety valve	-
	Electric motor	Air receiver

Electric motor

Main filter

Air receiver

Pressure switch

Manometer Refrigerated air dryer

Automatic drain of a Air compressor

condensate

Pneumatic and hydraulic schematic circuits design

Schematic symbols involved in a compressed air distribution and typical for pneumatics

V.	Choose one correct answer:		
		A) The throttle valve changes the cross-sectional area of the pressure line.	
		B) The throttle valve changes the flow rate of e.g. airflow.	
		Answers A) and B) are both correct.
